ENRIQUE JOSE ESTRADA NUÑEZ

Profile

I am a Senior **Front End Developer, UI and UX** with 8+ years of experience, pro-active and very responsible. Good communication skills, teamwork and leadership. I like constant growth, new knowledge and challenges.

WORK EXPERIENCE

Business Solutions

From August 2021.

As a Tech Lead Manager at my current company, I have played a pivotal role in a comprehensive technological update process. Leveraging my technical background, I have successfully led a diverse team of over 20 professionals, including front-end developers and designers.

My leadership has been instrumental in establishing an efficient workflow, enabling us to deliver high-quality projects within the stipulated timelines. I have imparted knowledge on best development practices and trending technologies, fostering a culture of continuous learning and improvement within the team.

Under my guidance, we have developed and launched new products, including email development, animated banners, and websites. This has significantly increased our project coverage and output.

On average, I manage around 10 projects monthly, consistently delivering excellent results in terms of quality and adherence to deadlines.

Assemble Studio Web Developer (currently)

From August 2021.

In my role, I was responsible for the development and maintenance of Email Campaigns, Banners, Landing Pages, and Websites catering to the diverse needs of the company's clients.

My responsibilities included receiving and interpreting client requirements and the creative briefs for various projects. I worked closely with the design department to implement and enhance UX practices and establish industry standards.

I was actively involved in all stages of project development, from requirements gathering to UX and UI design. I contributed to the creation of wireframes, mockups, and layouts for various projects, utilizing tools such as Adobe XD, Figma, Sketch, and Balsamiq.

In an effort to streamline the development process, I developed a bundle with Node JS and other tools, incorporating reusable code to enhance efficiency and productivity.

Web Developer Senior Analyst - Accenture

From July 2020

In my role, I was tasked with the creation and maintenance of Email Campaigns, Banners, Landing Pages, and Websites, all tailored to the diverse needs of our clients.

I was responsible for interpreting client requirements and creative briefs for a variety of projects. I also worked in close collaboration with the design team to implement and enhance UX practices, setting industry standards in the process.

My involvement spanned all stages of project development, from initial requirement analysis to UX and UI design. I contributed to the creation of wireframes, mockups, and layouts for numerous projects, utilizing tools such as Adobe XD, Figma, Sketch, and Balsamiq.

To streamline the development process, I developed a bundle with Node JS and other tools, incorporating reusable code to enhance efficiency. This also involved the use of Salesforce for handling dynamic data and the development of templates and modules, further showcasing my versatility and technical prowess.

Front End Developer - Prime Ideas-Sportsbook

From February 2016. to October 2018

In my role, I was responsible for the development and maintenance of Websites, forms, and other interfaces for various internal projects within the company.

As a Front-End technical lead, part of my duties included providing training and mentorship for junior developers. I worked closely with the design department to implement and enhance UX practices, and my coding practices were adopted as company standards.

I was actively involved in all stages of project development, from requirements gathering to UX and UI design. I contributed to the creation of wireframes, mockups, and layouts for various projects.

I utilized a range of Front-End technologies, including Laravel (Blade), React Js, and VUE JS, to interface with the Back-End.

My role also involved participating in multiple interfaces and integrations for an online payment engine and an Interactive Sportsbook betting application.

Front End Developer - Experian Marketing Services

From July 2012 to October 2015

In my position, I was charged with the design and upkeep of Email Campaigns, Banners, Landing Pages, and Websites, each customized to the unique requirements of our clients.

My duties encompassed deciphering client needs and creative directives for a range of projects. I partnered with the design team to enforce and refine UX practices, thereby establishing benchmarks within the industry.

I was engaged in every facet of project development, from the inception stage of requirement analysis to the execution of UX and UI design. I assisted in the production of wireframes, mockups, and layouts for a variety of projects, employing tools such as Adobe XD, Figma, Sketch, and Balsamiq.

In an effort to optimize the development process, I engineered a bundle with Node JS and other tools, integrating reusable code to boost productivity. This also included the utilization of Salesforce for managing dynamic data and the creation of templates and modules, further demonstrating my adaptability and technical acumen.

Web Development Trainer and Manager - Colegio Boston

From June 2008 to June 2011

At this company, I worked as a Computer Science Instructor, teaching courses in office software including Windows, Word, Excel, PowerPoint, Access, and Internet usage.

In addition to these, I also taught web development courses, covering HTML, CSS, and JavaScript.

As the Academic Coordinator and Head of Teachers, I led a team of 25 individuals, overseeing their work and providing guidance and support as needed.
